- Search, view, book and pay online
- Fully self-service

## Empowering Students

Students can take control to choose what they want, when they want it. They can define their preferences, such as distance to education provider, meals, and WiFi. Their matches are then displayed, and they are able to view and select an available property.

## No Hidden Expenses

When booking with StudentBnB, students only pay for your accommodation and preferred options; there are no other extras such as a bond or a lease. There is also no booking or placement fee! It's the best accommodation choice by far, because students are in control!

## Flexibility

We understand that students want to live somewhere safe, and that they don't want to be locked in to a contract. StudentBnB gives them the flexibility to book accommodation, for when and where they want, with no extra charges. They can access properties right across Australia, so even if they're on a break from school, they can use StudentBnB to book accommodation for their travel destinations across Australia and enjoy the same benefits.

## Safety

All of our properties are visually inspected and checked to be suitable. Permanent residents in the property are also interviewed and Government checked to improve student safety.

Students will find that they can rent a room of their choice, or add on a meal service, for **less than they would spend at a backpackers!**

Simply place a link on your website and direct students to your accommodation page to book and pay for their own accommodation, making life easier for everyone!
